CITY OF BELOIT	Rock River Parking Deck Removal	Rock	SC	\$800,000.00	\$342,857.14	<p>The removal of the 1.2 acre Rock River Parking deck includes the removal of the supporting piles located in the Rock River. This will increase the flood storage by the area which is occupied by the piles (72 c. yard). It also eliminates the back ups caused by debris (trees) caught amongst the piles. The benefits of removing this structure is an increase of 72 cubic yards of flood storage and the removal of obstacles within the waterway that trap debris.</p> <p>The Rock River Parking Deck spans the Rock River and is bordered by the Grand Avenue and Broad Street Bridges to the east and west respectively and surface parking lots are located both north and south. Rock County: Range 12 E, Township 1 N, Section 35, SE Quarter.</p>
CITY OF NEW BERLIN	U-314 Fullerton Avenue Property	Waukesha	SE	\$147,070.00	\$63,030.00	<p>The City of New Berlin will acquire property located near I-section of Calhoun Road &amp; Greenfield Avenue in the Buena Park Subdivision with a street address of 17111 W. Fullerton Avenue, New Berlin, WI. The 1.5 story residence and a two car detached garage will be removed from this property to provide permanent open space flood storage and control of flood waters. Removal of the buildings on the property will allow unobstructed flood water flow to minimize road flooding. The flood water will be allowed to remain on the property and then slowly and naturally subside as it soaks into the ground. Groundwater recharge will be increased while flooding is managed by using this land for open space flood control. This property will be deed restricted to permanent open space with only open space activities allowed on the property.</p>

CITY OF PRESCOTT	Prescott Flood Control	Pierce	WC	\$222,233.00	\$95,242.72	<p>The primary goal of this project is to raise three homes above the floodplain.</p> <p>All three parcels are single-family residential and have been so for more than five years. The three non-contiguous residential parcels are located along Lake Street overlooking the east bank of the St. Croix River. The following three properties will be raised from the floodplain with this grant:</p> <p>1) 331 Lake Street (Adrian Property): Flood waters have damaged the basement foundation, siding, and landscape.</p> <p>2) 525 Lake Street (Johnson Property): Walls have been weakened from the water pressure and erosion. The concrete floor in the screened porch is cracking, has shifted and is sinking due to erosion caused by the flooding.</p> <p>3) 625 Lake Street (Armstrong Property): A corner of the foundation was broken by ice during one of the floods. Portions of the basement have had to be replaced because of flood damage.</p> <p>As a result of this project the homes will be flood proofed: The living area of the structures will be elevated to a height greater than two feet above the regional flood elevation, the living space in these three homes will be protected from future flood damage. Elevation of the homes will allow for a safe and sanitary living area as well as eliminate the cost of future flood damage.</p>
CITY OF WAUWATOSA	Muellner Building & Parks Dept. Building Floodproofing	Milwaukee	SE	\$800,000.00	\$342,857.14	<p>The primary goal of the project is to floodproof two municipal buildings located within the 100-year floodplain on the north bank of the Menomonee River at 7300 Chestnut Street. The buildings are located adjacent to one another within Hart Park. One of the buildings is the Parks Administration building and the other is the "Muellner Building" used by the city to host numerous social and cultural activities in addition to park maintenance activities. The Muellner Building is eligible for application to the National Register of Historic Places. Both buildings have sustained damage during the two 100-year flood events which occurred in the late 1990's. Flood-proofing the two structures will insure the safety of the structures and their contents in addition to preservation of two historical buildings.</p>

Project Sponsor	Project Name	County	DNR Reg	Grant Amt (State Share)	Local Share	Project Desc
TOWN OF JAMESTOWN	Kieler Creek Property Acquisition	Grant	SC	\$62,930.00	\$26,970.00	THE TOWN OF JAMESTOWN WILL ACQUIRE PROPERTY WITH A 1 1/2 STORY RESIDENTIAL STRUCTURE WITH BASEMENT LOCATED 15' FROM KIELER CREEK AT 3573 COUNTY HWY HHH, KIELER, WI. DURING FLOOD EVENTS, WATER SURROUNDS THE STRUCTURE AND WITH THE MOST RECENT FLOOD EVENT OF JUNE 2004, THE SOUTHEAST CORNER OF THE FOUNDATION EXPERIENCED A CRACK FROM FOOTING TO TOP OF FOUNDATION WALL. REPAIR IS IMPRACTICAL GIVEN THE CLOSE PROXIMITY OF THE CREEK TO THE DWELLING. ACQUISITION OF THE PROPERTY AND REMOVAL OF THE BUILDING FROM THE PROPERTY WILL ALLOW FOR UNOBSTUCTED FLOW OF WATER OVER THE LAND AND INCREASE WATER STORAGE CAPACITY ON THE CREEK. THIS PROPERTY WILL BE DEED RESTRICTED AS PERMANENT OPEN SPACE.
TOWN OF PARIS	WEST LANE PROPERTY ACQUISITION	Grant	SC	\$45,780.00	\$19,620.00	THE TOWN OF PARIS WILL ACQUIRE PROPERTY WITH A RESIDENTIAL STRUCTURE IN THE 100 YEAR FLOOD PLAIN AT 4892 WEST LANE RD, CUBA CITY WITH REPETITIVE FLOODING AND PROPERTY DAMAGE. THIS PROPERTY LOCATED NEAR THE CONFLUENCE OF THE PLATTE AND THE MISSISSIPPI RIVERS HAS EXPERIENCED INCREASED SILTRATION WHICH HAS REDUCED THE WATER STORAGE CAPACITY OF THE RIVER, RESULTING IN MORE FREQUENT HIGH WATERS. ACQUISITION OF THE PROPERTY AND REMOVAL OF THE BUILDING FROM THE PROPERTY WILL ELIMINATE SUBSEQUENT PROPERTY DAMAGE, ALLOW FOR UNOBSTRUCTED FLOW OF WATER OVER THE LAND AND INCREASE WATER STORAGE CAPACITY OF THE AREA. THIS PROPERTY WILL BE DEED RESTRICTED AS PERMANENT OPEN SPACE.
TOWN OF WHEATLAND	Fox River Flood Mitigation	Kenosha	SE	\$146,094.20	\$62,611.80	The Town of Wheatland will acquire the Larson property and remove the residential building located at 32120 77th Street, Salem, Wi. The benefits of this project include the elimination of the potential for additional flood damage to this property located in the 100 year recurrence interval floodplain of the Fox River. Less hazard assistance will be required from local govenment emergency service providers during times of flooding. This project will create additional deed restricted permanent open space for water flowage to the Fox River. This property is limited to use for open space activity only and public access to the Fox River.
